

Creative Extruded Products Announces New Products & Changes to the FlexiTrim™ Line

New to the FlexiTrim™ lineup are the underside moldings FTUS08 and FTUS10 that utilize Creative's patented tear away alignment guide. This unique guide aids in aligning the molding on glass and makes the installation of the underside moldings simple and fast without the need for tools. The FTUS08 and FTUS10 are the only underside moldings available that use black tape (instead of gray) that blends in with the windshield frit.

All FlexiTrim moldings are now available at new pricing due to the streamlining of the distribution channel and standardized packaging. Please contact your local distributor for samples of the new FlexiTrim underside moldings and the new FlexiTrim pricing.

Creative also has new sales tools available for FlexiTrim. See the below photos of the new FlexiTrim brochure and FlexiTrim Application Wall Chart. Additionally, Creative has FlexiTrim samples and application guides that will assist you in the sales and installation of FlexiTrim moldings. Please contact your local distributor for these new tools.

Creative Extruded Products has manufactured FlexiTrim moldings since 1995 and continues to produce high performance molding systems at a competitive price for automotive glass technicians, including other products such as ExacTrim™ vehicle specific moldings and GRIPflex™ on-glass moldings. For more information on Creative or its products, please contact your local distributor or call 800-273-1535 or visit www.creativeextruded.com.
